## Help at Home

## Parent Booklet

## Maths $N$ <br> Improvement

Key Stage 2

## Targets \& Strategies

## During KS2 your child may be working towards achieving and being competent in the following areas:

## P5

- Read/write simple fraction notation
- Count forwards/backwards in halves, quarters
- Know near doubles within 20 (8+7)
- Know components of the number $20(16+4)$
- Know all remaining addition facts within 20
- Add 3 single digit numbers
- Subtract any number from 20
- Know all remaining subtraction facts within 20
- Find halves of even numbers within 20
- Find doubles of multiples of 100 up to $500+500$
- Add/subtract 100 to/from multiples of 100 within 1000 (300+100, 700-100)
- Add/subtract two 2 digit numbers within 100, without bridging 10 ( $35+22,67-34$ )
- Find what must be added to any 2 digit number to make 100 (34+?=100)
- Add/subtract multiples of 100 to/from multiples of 100 within $1000(300+400,900-300)$
- Find what must be added to multiples of 100 to make 1000 (400+?= 1000)
- Find what must be added to/subtracted from any 3 digit number to make the next higher/lower multiple of 10, 10 (234+?=240, 456-?=450, 647+?=700, 278-?=200)
- Add 100 to any 2 or 3 digit number within $1000(345+100)$
- Subtract 100 from any 3 digit number (478-100)
- Add a multiple of 100 to a 2 -digit multiple of $10(30+400)$
- Add a multiple of 100 to any 2 or 3 digit number within $1000(34+400,327+500)$
- Subtract a multiple of 100 from any 3 digit number (578-300)
- Calculate doubles of multiples of 50, answers within 1000 (double 450)
- Derive corresponding halves
- Calculate double of multiples of 10 up to 200 (double 130)
- Derive corresponding halves
- Know multiplication facts for 3's, 4's x. Tables

## Targets \& Strategies

## P6

- Count, read and write any number, including a decimal number. E.g. 3.05
- Put a set of numbers, including decimals, in order of size. E.g. 3.03, 3.3, 3.31, 30001
- Know the pairs of numbers which make one hundred - e.g. 46+54
- Add two numbers in their heads. E.g. 34+15+9+2
- Add or subtract multiples of 10 or 100. E.g. 3046-800
- Subtract one number from another when the numbers are close. E.g. 609-587
- Subtract one number from another when the numbers are not close. E.g. 514-29
- Know their tables up to $10 \times 10$ and be able to use these facts to do simple divisions. E.g. $4 \times 8=$ ? And $32 \div 4=$ ?
- Multiply or divide by 10 or 100. E.g. 13x10, 245x100, 5.2x10, $350 \div 10$
- Multiply a 2-digit number. E.g. 5x14
- Double and halve numbers to 1000

## P7

- Count, read, write, order numbers to 100,000
- Estimate the total of 2 or 3 items in a shopping list ( $£ 2.99+£ 4.49+£ 1.99)$
- Count read write order decimal numbers to 2dp
- Find simple non-unitary fractions of quantities by dividing by denominator, multiplying by numerator ( $2 / 3$ of 15 )
- Find $20 \%, 30 \%, 40 \%$... $90 \%$ of quantities by finding $10 \%$ and multiplying appropriately ( $40 \%$ of 80)
- Add 4 or more single digit numbers
- Add any number to a multiple of $1000(4000+423)$
- Subtract a multiple of 1000 from any 4 digit number (4567-3000)
- Add any 2 digit numbers including bridging the 10 and 100 (67+77)
- Subtract a 2 digit multiple of 10 from any 3 digit multiple of 10 without bridging through the hundred (670-430)
- Add/subtract decimals to 1 dp decimal number greater than 1 to make the next whole number (23.2+?=24)
- Multiply a 2 digit multiple of 10 by a single digit (40x7)
- Multiply a 3 digit multiple of 100 by a single digit (400x7)
- Multiply a 3 digit number by 100 ( $456 \times 100$ )
- Multiply two 2 digit multiples of 10 (30x60)
- Divide whole numbers by 100 , whole number answers $(4600 \div 100)$

## Times Table Square

| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 2 | 4 | 6 | 8 | 10 | 12 | 14 | 16 | 18 | 20 |
| 3 | 6 | 9 | 12 | 15 | 18 | 21 | 24 | 27 | 30 |
| 4 | 8 | 12 | 16 | 20 | 24 | 28 | 32 | 36 | 40 |
| 5 | 10 | 15 | 20 | 25 | 30 | 35 | 40 | 45 | 50 |
| 6 | 12 | 18 | 24 | 30 | 36 | 42 | 48 | 54 | 60 |
| 7 | 14 | 21 | 28 | 35 | 42 | 49 | 56 | 63 | 70 |
| 8 | 16 | 24 | 32 | 40 | 48 | 56 | 64 | 72 | 80 |
| 9 | 18 | 27 | 36 | 45 | 54 | 63 | 72 | 81 | 90 |
| 10 | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 | 100 |

## Multiplication Cards

## Useful Websites:

## www.mathsisfun.com

- Homepage > Numbers
- Multiplication > Maths Trainer

Really good way to train your child when they have a good understanding of multiplying.

## www.topmarksmaths.co.uk

- Whiteboard Resources > KS1
- Multiplication and Division

1. Ghostblasters
2. Multiplication Explorer
3. Gordons Multiplication

## www.topmarksmaths.co.uk

- Whiteboard Resources > KS2
- Multiplication and Division

1. Spinners
2. Function Wheel

## www.google.com

- Search 'Woodlands Mathszone'
- Timestables > Timestables Games

For all of the above websites these are only some examples, you can feel free to try other games as well!

Blank Grids to help with multiplication

|  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |

|  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

## Table Patterns (2, 4, 8)

a) Get your child to use the Blank Grid on page 6 In the spaces on the top strip (using a pencil) write out the counting in 2s E.g.

| 2 | 4 | 6 | 8 | 10 | 12 | 14 | 16 | 18 | 20 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

b) In the spaces on the strip directly below (using a pencil) write out the counting in 4s:

| 4 | 8 | 12 | 16 | 20 | 24 | 28 | 32 | 36 | 40 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

Problem Solve: What do you notice?
c) Cover a number(s) and ask what number is missing? How did you know?
d) In the spaces on the strip directly below(using a pencil)write out counting in 8 s

| 8 | 16 | 24 | 32 | 40 | 48 | 56 | 64 | 72 | 80 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

e) Repeat ' $c$ '
f) Rub out pencil marks and repeat $4 \mathrm{a}-\mathrm{c}$ with counting in 5 s and 10 s
g) Rub out pencil marks and repeat $4 a-c$ with counting in $3 s$ and $6 s$

## 9 Times

a) You can help with tables beyond 5 too e.g. 9 times tables.

Tip: Always remember that $9=10-1$
b) Encourage them to count on 10-1 as they are doing the count. E.g.

$$
+10=19-1 \quad+10=28-1 \quad+10=37-1 \quad+10=46-1
$$

| 9 | 18 | 27 | 36 | 45 |
| :--- | :--- | :--- | :--- | :--- |

c) Get your child to draw these on an ENL.

d) You can help your child with little 'tips' on 9 times tables too when they have a good understanding. E.g. Number your fingers (and thumbs) 1-10 from left to right. Choose any number 1-10, for example; 7. Put down your $7^{\text {th }}$ finger. Ask your child how many fingers they have raised to the left? (Answer = 6). How many fingers they have raised to the right? (Answer $=3$ )

## No Friends! '7 Times'

a) The 7 Times tables seem to have no 'friends at all. Yet if we know all the rest of them, things should be easier.
b) Get your child to make or take out a 10 strip. Ask them to put on the multiples of 7 (7 Times Tables) that they definitely know. E.g.

| 7 | 14 |  |  | 35 |  |  |  |  | 70 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

c) Now help them to fill in the missing ones by asking questions like;
a. What is $14+7(14+6+1)=20+1=21$
b. What is $21+7(1+7=8)$ so $21+7=28$
c. What is $35+7(35+5+2)=40+2=42$
d. What is $42+7(2+7=9)$ so $42+7=49$
e. What is $49+7(49+1+6)=50+6=56$
f. What is $56+7(56+4+3)=60+3=63$
g. What is $63+7(3+7=10)$ so $60+10=70$
d) Sometimes with tables more than 5 times it is easier if we split up the multiply sum.
E.g. What is $7 \times 8$ ?

But I do know (5) $\times 8=40$

(2) $\times 8=+16$

56

## Data Handling

1. Go to www.topmarksmaths.co.uk - whiteboard resources - KS2.

Get your child to play/practise some of the following good challenging activities (and you as well!)
a) Bar Charts
b) Carroll Diagrams
c) Data Handling
2. Sit down with your child and design a simple bar chart e.g. favourite teams, xbox games etc.

## Shape and Space

1. Go to www.topmarksmaths.co.uk - whiteboard resources - KS2
a. Get your child to play some of the following games (you sit down and play too!)
i. Symmetry
ii. Reflections
iii. Symmetry Game
iv. Belly Bug (Co-Ordination)
v. Co-Ordinate Cards
2. Google - oswegomaths - Go to resources oswego.org/games
a. Go to Banana Hunt
3. Look for things in your house with lines of symmetry e.g. windows, doors, tables etc.

## Measures

## Remember;

| $10 \mathrm{~mm}=1 \mathrm{~cm}$ | $500 \mathrm{~g}-1 / 2 \mathrm{Kg}$ |
| :---: | :---: |
| $100 \mathrm{~cm}-1 \mathrm{~m}$ | $250 \mathrm{~g}-1 / 4 \mathrm{Kg}$ |
| $1000 \mathrm{~m}-1 \mathrm{~km}$ | $1000 \mathrm{ml}-1 \mathrm{l}$ |
| $500 \mathrm{~m}-1 / 2 \mathrm{~km}$ | $500 \mathrm{ml}-1 / 2 \mathrm{l}$ |
| $250 \mathrm{~m}-1 / 4 \mathrm{~km}$ | $250 \mathrm{ml}-1 / 4 \mathrm{l}$ |
| $1000 \mathrm{~g}-1 \mathrm{Kg}$ |  |

a) Give your child practice in counting on when using $\mathrm{m}, \mathrm{g}, \mathrm{ml}$ to nearest $\mathrm{km}, \mathrm{kg}, \mathrm{l}$ (Follow these examples).

## Example 1:

If I walk 260m, how much more do I need to walk to reach 1km (1000m)?
Tip: Use the Empty Number Line

Answer = 740m
a) Mark 260 m and 1000 m
b) Mark in next hundred to 260 i.e. 300 and show 'hop' forward (40m)
c) Show the hop from 300-1000 i.e. 700 .

## Example 2:

My water bottle holds 200ml and I have drank 95ml. How much have I left?

## Measures

## Example 3:

A bag of sugar holds 500 g . I use 115 g for baking a cake. How much have I got left?

Answer $=385 \mathrm{~g}$

Tip:
a) Mark in 115 g and 500 g
b) Count on 5 from 115 to next 10 (120)
c) Count on 80 to next 100 (200)
d) Count on 300 to make 500.
(i) Good activities on topmarksmaths.co.uk - whiteboard resources - KS2
a. Understanding Measures
b. Temperature
c. Dartboard Rounding
a) Give your child time to explore various measures.
E.g. 1. Cooking: What ingredients are needed?

How much of each ingredient?
(This can be formal like 10 g of sugar, 2 g of salt and 100 g of flour etc. OR informal like a tablespoon of sugar, 3 handfuls of flour etc.)
E.g. 2. Length of garden shed: How many child's strides?

How many child's footsteps?
Do you need to measure it all? (Maybe halfway may do!)
E.g. 3. Filling the 2 litre milk carton with 100 ml glass. How many do you think it will be? Were you correct?

## Time

## Things I Need for Time

## Materials:

- Clock (in wallet)

Useful Websites:

## www.topmarksmaths.co.uk

Whiteboard Resources
KS2
Measures
www.topmarksmaths.co.uk - Whiteboard Resources KS2 - Measures
a) Class Clock

Give your child plenty of practice setting the 'Class Clock' to different times and get them to do the same with the one provided in the wallet.

Teaching Tip: Start with o'clocks, then half past, quarter past, quarter to etc.
Make sure your child follows what they see on the 'Class Clock' activities.
b) Get your child to add/take away some times now e.g. 1hr, 1/2hr (30 mins), $1 / 4 \mathrm{hr}$ ( 15 mins ) etc. Get them to do these with their own clock.

Show some of these on an Empty Number Line (ENL)
a. E.g. $-9.45 \mathrm{am}+1 \mathrm{hr}$

Answer $=10.45 \mathrm{am}$
b. E.g. $-5.45 p m+1 / 2$ hour ( 30 mins )

## Time

a. E.g. $-10: 05 a m-1 / 4 \mathrm{hr}(15 \mathrm{mins})$

Answer = 9:50am
a) Other good activities from 'Measures related to Time' (topmarksmaths website) include;
a. Clock
b. On Time - Advanced Level
c. Telling the Time
b) Give your child more practice in adding/taking away times of everyday events using Empty Number Lines (ENLs)
a. Example 1: The film starts at 7.30pm and goes on for 1 hr 40 mins . What time is it over at?

## Answer: 9:10pm

f. Example 2: If I get home from school at 3.45pm and get my tea at 6.15pm, how long do I have to wait?

Answer: 2hrs 30mins
Tip: Count on minutes to next 'O'Clock' (15mins) and then how many hours to next 'O'Clock' (2hr) and then count on minutes from 'O'Clock' (15mins).

## Numbers

## Prime numbers

- Prime numbers are special numbers that can only be divided by themselves and 1
- 19 is a prime number. It can only be divided by 1 and 19.
- The number 1 is not thought of as a prime number.
- 9 is not a prime number. It can be divided by 3 as well as 1 and 9 .
- The prime numbers below 20 are: $2,3,5,7,11,13,17,19$

## Triangular Numbers

- A number than can make a triangular dot pattern.
- Example: 1, 3, 6 and 10 are triangular numbers

| 1 | 2 | 3 | 4 | 5 |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |

## Lines

Parallel lines are always the same distance apart.

Perpendicular lines cross at right angles

## Lines of Symmetry

A 2D shape is symmetrical if a line can be drawn through it so that either side of the line looks exactly the same. The line is called a line of symmetry.

Square 4 lines of symmetry

Isosceles Triangle 1 line of symmetry

Equilateral Triangle 3 lines of symmetry

Rectangle 2 lines of symmetry

Parallelogram
0 lines of symmetry

## Shapes

## 2D Shapes

- Squares have 4 straight • sides and 4 corners.
- All the sides are the same length

- Rectangles have 4 sides and 4 corners.
- They have 2 long sides and 2 short sides.

- Triangles have 3 sides and 3 corners.
- Circles only have one side and no corners.

- This is a pentagon.
- It has 5 straight sides and 5 corners.
- All the sides are the same length.

- This is an octagon.
- It has 8 sides and 8 corners.
- All the sides are the same length.

- A semi-circle has one straight side and one curved side.
- 2 semi-circles make a circle.

- This is a hexagon.
- It has 6 sides and 6 corners.
- All the sides are the same length

## 3D Shapes

This 3D shape has not flat faces and no straight edges. curved face and one flat It has just one curved face. This is a sphere.

This 3D shape has 6 flat faces; 2 are squares and 4 are rectangles. It has 12 straight edges and 8 corners.
This is a cuboid.

This 3D shape has one face. The flat face is a circle. This is a cone.

This 3D shape has 5 flat faces; 2 are triangles and 3 are rectangles. It has 9 straight edges and 6 corners.
This is a triangular prism.

This 3D shape has 5 flat faces; 4 are triangles and 1 is a square. It has 8 straight edges and 5 corners.
This is a square based pyramid.

This 3D shape has 4 flat triangular faces. It has 6 straight edges and 4 corners.
This is a triangular based pyramid.

## Triangles

Triangles have three sides. There are many different types of triangles:

- 3 equal sides
- 3 equal angles of 600

- No equal sides
- No equal angles

- 2 equal sides
- 2 equal angles

- One of its angles is a right angle (90 o)

## Polygons

Polygons are shapes with many straight sides:

- Regular polygons have equal angles and sides of equal length
- Irregular polygons have sides of different lengths

Here are some common polygons:

Pentagons have 5 sides

Heptagons have 7 sides

Hexagons have 6 sides

## Quadrilaterals

Quadrilaterals have four sides. Here are some special quadrilaterals:

Square

- 4 equal sides
- 4 right angles

Trapezium

- One pair of parallel sides of different lengths

Rectangle

- 2 pairs of equal sides
- 4 right angles

Kite

- 2 pairs of equal sides next to each other
- No parallel sides

Parrellelogram (squashed rectangle)

- 2 pairs of equal sides
- Opposite sides are parallel
- Opposite angles are equal

Rhombus (squashed square)

- 4 equal sides
- Opposite sides are parallel
- Opposite angles are equal

## Multiplication Definitions

Here are some of the words which we use when doing multiplication sums. Have look below to see how they can be used in the simple sum $2 \times 2=4$.

| Multiply | $\bullet$ •If you multiply 2 by 2 you get 4. |
| :--- | :--- |
| Multiple | $\bullet$ •4 is a multiple of 2. |
| Times | $\bullet \cdot 2$ times 2 is 4. |
| Sets of | $\bullet \cdot 2$ sets of 2 make 4. |
| Lots of | $\bullet \cdot 2$ lots of 2 make 4. |
| Groups of | $\bullet \cdot 2$ groups of 2 make 4. |
| Factors | $\bullet 2$ is a factor of 4. One number is a factor of another <br> number if it divides or goes into it exactly. |
| Product | $\bullet$ The product of 2 and 2 is 4. |

## Percentages \%

## Percent means 'out of 100'

- The sign \% stands for 'per cent' which means 'out of 100 '.

Example:

- $40 \%$ means 40 out of 100
- $11 \%$ means 11 out of 100

Converting between percentages and decimals
To change a percentage to a decimal, divide by 100
Example:

- Change $48 \%$ to a decimal: $48 \div 100=0.48$

To change a decimal to a percentage, multiply by 100
Example:

- Change 0.67 to a percentage: $0.67 \times 100=67 \%$

Converting between percentages and fractions
Write the percentage as a fraction over 100 and then simplify
Example:

- $60 \%$ means 60
- $60=6=3$
- 100105
- Learn these equivalent fractions and percentages
- $1 / 2=50 \%$
- $1 / 4=25 \%$
- $1 / 10=10 \%$
- $3 / 4=75 \%$
- $1 / 5=20 \%$

## Percentage of a number

Example:

- To find $20 \%$ of 30 is to first find $10 \%$ of 30 and then multiply by 2.
- $10 \%$ of 30 is $30 \div 10=3$
- $2 \times 3=6$
- Or recognise that $20 \%$ is equivalent to one fifth, and so just divide 30 by 5 .
- $30 \div 5=6$

## Time

## Analogue Clock

There are 60 minutes in an hour.

There are 5 minutes between each number and the next.

There are 15 minutes in a quarter of an hour.

There are 30 minutes in half an hour.

- The large hand on a clock is always the minute hand.
- The small hand on a clock is always the hour hand.
- Before noon is known as AM and afternoon is known as PM.

## 24 Hour Clock

| 12 Hour Clock | 24 Hour Clock | 12 Hour Clock | 24 Hour Clock |
| :---: | :---: | :---: | :---: |
| 12pm | 1200 | 12am | 0000 |
| 1pm | 1300 | 1 am | 0100 |
| 2pm | 1400 | 2 am | 0200 |
| 3 pm | 1500 | 3 am | 0300 |
| 4pm | 1600 | 4am | 0400 |
| 5pm | 1700 | 5 am | 0500 |
| 6pm | 1800 | 6am | 0600 |
| 7pm | 1900 | 7 am | 0700 |
| 8pm | 2000 | 8am | 0800 |
| 9pm | 2100 | 9am | 0900 |
| 10pm | 2200 | 10am | 1000 |
| 11pm | 2300 | 11am | 1100 |

## Units of Time

## How Many Days?

## Remember:

30 days has September, April, June and November.
All the rest have 31.
Except for February all alone, which has 28 days clear but 29 in each leap year.

## Measuring

## Perimeter

## What is Perimter?

- The perimter is the distance all the way around the outside of a 2D shape.
- To work out the perimeter, add up the lengths of all the sides.

## Example:

The perimeter of this shape is:
$8+4+7=19 \mathrm{~cm}$

In a rectangle opposite sides are equal, so to work out the perimeter of a rectangle you just need to know the length and width.

## Example:

Here the length is 8 cm and the width 5 cm .
Method 1

$$
(8 \times 2)+(5 \times 2)=16+10=26
$$

## Volume

Each of these two cuboids has the same volume, 10 cm 3 , and the same dimensions: length 5 cm , width 2 cm , height 1 cm .

The volume of the first can be found by counting the unit cubes.
The volume of the second is found using the rule:

## Volume of a cube or cuboid $=$ length x breadth x height

This cube has sides of length 3 cm
Its volume is $3 \times 3 \times 3=27 \mathrm{~cm} 3$

## Measuring Capacity

Capacity or volume is a measure of how much space something takes up. Measuring spoons or measuring jugs can be used to measure capacity.
To find the Volume or Capacity of a cube or cuboid container:

## Volume $=$ Length $\times$ Breadth $\times$ Height

Metric Units of Capacity
Capacity is measured in millilitres ( ml ) and litres ( l ).

- 1l-1000ml
- $3 / 4 \mathrm{l}-750 \mathrm{ml}$
- $1 / 2 \mathrm{l}-500 \mathrm{ml}$
- $1 / 4 \mathrm{l}-250 \mathrm{ml}$
- cm3
- m3

## Imperial units of capacity:

- Pints and gallons are old units of capacity (imperial units)
- There are 8 pints in a gallon
- A pint is equal to just over half a litre
- A gallon is roughly equal to 4.5 litres

Use these tips to estimate capacity:

- 5 ml is about the capacity of a teaspoon.
- 11 is about the capacity of a large carton of fruit uice

## Rounding Tens, Hundreds, Thousands

Rounding a number is another way of writing a number approximately. We often don't need to write all the figures in a number, as an approximate one will do.

## Rounding to the nearest ten

To round a number to the nearest 10 , you have to decide if the number is nearest to $10,20,30$ etc. To do this you follow a rule.

Question: Is 37 nearer to 30 or to 40 ?

- As the unit figure is 7 , you round up to 40 .
- Rounding to the nearest 10 can help you estimate the cost of your shopping.

## Rounding to the nearest hundred

To round a number to the nearest 100, you have to decide if the number is nearest to 100, 200, 300 etc. The rule is the same as for rounding to the nearest 10, but this time look at the tens figure.

## Empty Number Line Ideas (No Strips)

## Useful Websites/Links
